EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Diane Burke on January 9, 2006.

The application has been amended as follows: claims 1-15 have been canceled as being directed to a non-elected invention.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: applicant's amendments and arguments are deemed to overcome the prior art rejections. In particular, the independent claims have been amended to include the recitation that the transfer channel is in heat transfer isolation from the cannula assembly. Applicant's arguments, including the Declaration of Philip E. Eggers, stating that the Hooven device would fail to provide heat transfer isolation between the transfer channel and the cannula are deemed persuasive, particularly given the specific material and spacing used in the Hooven device. Other prior art devices similarly fail to disclose the particular heat transfer isolation between a fluid removal channel and an outer cannula assembly, and the claims are therefore deemed allowable over the prior art of record.

Art Unit: 3739

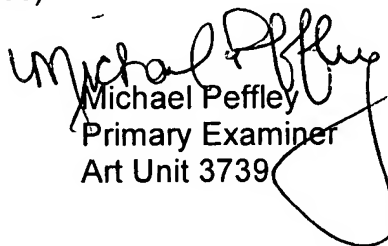

It is noted that the previously withdrawn dependent claims have now been rejoined with the allowable independent claims. Claims 16, 17, 19-36, 38, 40, 42-44, 46-63, 65, 67 and 69 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
